Loss Prevention Certification Board	
	
CERTIFICATE OF QUALITY SYSTEM REGISTRATION	
This is to certify GULF SECURITY TECHNOLOGIES CO., LTD (Manufacturing Division of Global System Technology PLC)	
has complied with the requirements identified in	
ISO 9001: 1994	
and is authorised to use the LPCB mark on stationery and publications related to the following products and/or services	
Design and manufacture of fire detection and alarm systems and components	
Certificate No.	548 Issue 2
Issued	24 June 2002
Valid Until	31 December 2003
Signed on behalf of the LPCB	
E MATTIE-SULEIMAN 	
<small>LPCB is part of BRE Certification Ltd., Garston, Watford WD25 9JX. Intelligent Photoelectric Smoke Detector

- Aesthetically pleasing Low profile design
- 8 Bit intelligent processor with A/D converter
- Built in algorithm maps for false alarm rejection.
- Electronically addressed
- Sensitivity adjustable via hand held programming tool.
- Removable Optical chamber for easy cleaning and maintenance.
- Conventional detector version also available (C-9102)

Technical Specifications

- Operating voltage: Loop 24V
- Operating current
Standby current: $\leq 600\mu A$
Alarm current $\leq 2mA$
- Operating environment:
Temperature :- $10^{\circ}C \sim + 50^{\circ}C$
Relative humidity: $\leq 95\%$
- Dimension: Diameter: 10cm Height: 5cm

I-9102

Intelligent Dual Heat Detector

- Fixed Temperature and Rate of Rise Detection
- Aesthetically pleasing Low profile design
- 8 Bit intelligent processor with A/D converter
- Electronically addressed
- Fixed Temperature response is adjustable via hand held programming tool between $58^{\circ}C$ and $74^{\circ}C$
- Conventional detector version also available (C-9103)

Technical Specifications

- Operating voltage: Loop 24V
- Operating current:
Standby current: $\leq 800\mu A$
Alarm current $\leq 1.4mA$
- Operating environment:
Temperature:- $10^{\circ}C \sim + 50^{\circ}C$
Relative humidity: $\leq 95\%$
- Dimension: Diameter: 10cm Height: 5cm

I-9103

Intelligent Ultraviolet Flame Detector

- Sensitive Ultraviolet sensor that detects the UV rays produced by a flame
- Not effected by sunlight.
- Aesthetically pleasing Low profile design
- Dust / corrosion / Humidity resistant.
- Electronically addressed
- Conventional detector version also available (C-9104)

Technical Specifications

- Operating voltage: Loop 24V
- Operating current:
Standby current: $\leq 1.5mA$
Alarm current $\leq 10mA$
- Operating environment:
Temperature:- $10^{\circ}C \sim + 50^{\circ}C$
Relative humidity: $\leq 95\%$
- Detection Angle: ≤ 80 Degree
- Dimension: Diameter: 10cm Height: 5cm

I-9104

Combined Optical / Heat Detector

- Combining all the features of the I-9102 Optical and the I-9103 Dual heat detector to provide the ultimate cover for life safety systems
- Conventional detector version also available (C-9101)

Technical Specifications

- Operating voltage: Loop 24V
- Operating current:
Standby current: $\leq 800\mu\text{A}$
Alarm current $\leq 2\text{mA}$
- Operating environment:
Temperature: $-10^{\circ}\text{C} \sim +50^{\circ}\text{C}$
Relative humidity: $\leq 95\%$
- Dimension: Diameter: 10cm Height: 5cm

I-9101

Intelligent Linear Beam Detector

- Suitable for detection coverage of atriums and warehouses, factories, tunnels
- Range 10-100 metres
- Alignment indication LEDs and adjustable pivot base for easy beam alignment
- Reduced installation costs due to intelligent addressable control (no requirement for local control interfacing and reset)
- 8 Bit intelligent processor with algorithm maps for false alarm rejection
- Electronically addressed
- Conventional detector version also available (C-9105)

Technical Specifications

- Operating voltage: Loop 24V
- Operating current:
Standby current: $\leq 1\text{mA}$
Alarm current: 2.5mA
- Detection Range: Length from 10 to 100 meters, width 15 meters.
- Wiring: Non-polarized two-core 24VDC for emitter
Non-polarized two-core loop for receiver
- Operating environment:
Temperature: $-10^{\circ}\text{C} \sim +50^{\circ}\text{C}$
Relative humidity: $\leq 92\%$

I-9105

Standard Detector Base

- Non polarised terminals and multi-positioning design allows easy direction adjustment of the detector
- Compatible with GST conventional detectors
- Diode base version (DZ-03D) for conventional detectors with Active End Of Line(P-9907)

DZ-03

I-9201

Intelligent Manual Call Point

- Addressable Manual Call Point (MCP) with re-settable (non breaking) Glass
- Additional volt free contacts for local interfacing (i.e. PTZ camera preset)
- Two part plug-in construction with base mounted termination allows easy installation and connection
- Intelligent MCP can be addressed and plugged in to base at time of commissioning
- Electronically addressed
- Suitable for Semi-Flush and surface mount installation
- Conventional MCP version also available (C-9201)

Technical Specifications

- Operating Voltage: Loop 24V
- Operating Current:
Monitoring Current: $\leq 0.8\text{mA}$
Alarming Current: $\leq 2\text{mA}$
- N/O Output Contact: Rating Value 60VDC, 0.1A
Contact Resistance $\leq 100\text{m}\Omega$
- Operating Environment:
Temperature: $-10^{\circ}\text{C} \sim +50^{\circ}\text{C}$
Relative Humidity: $\leq 95\%$
- Dimension: 90mmX122mmX48.5mm

Handheld Programmer

P-9910

- Portable programming tool for addressing and testing of intelligent devices
- Programs all loop devices (1-242 addresses per loop)
- Interrogates device for Condition - Manufacturing Batch Number - Date of manufacture - alarm sensitivity
- Reprogram facility enables adjustment to alarm threshold of detectors.

Short Circuit Isolator

C-9503

- Isolates faulty part of the loop in the event of a short circuit
- Automatically resetting once the fault has cleared
- LED status Indicator
- Also available as Isolator base version that directly replaces the standard detector base (C-9502)
- Also Compatible with Conventional detection Circuits

Technical Specifications

- Operating Voltage: Loop 24V
Action Current: $\leq 170\text{mA}$
- Operating Environment:
Temperature: $-10^{\circ}\text{C} \sim +50^{\circ}\text{C}$
Relative Humidity: $\leq 95\%$
- Dimension: 120mmX80mmX40mm

Intelligent Combustible Gas Detector

- Available for LPG, Natural gas and Coal Gas.
- Built-in relay contacts for control of gas valves / Extract etc (I-9602)
- Built-in buzzer for local alarm
- Manual reset and control (on/off) of relay contacts
- Electronically addressed
- Conventional detector version also available (C-9601)&(C-9602)

Technical Specifications

- Operating voltage: Loop 24V
- Operating Consumption: ≤ 1.5 Watt
- Alarm Level: Pre-alarm 12%LEL
Urgent Alarm: 23%LEL
- Output: K1/K2, N/O contact, 3A/220VAC, active when pre-alarm
V1/V2, active output. 3A/5VDC, start when full alarm
- Wiring:
Non-polarised two-core for loop
Non-polarised two-core for 24VDC power supply
- Operating environment:
Temperature: $-10^{\circ}\text{C} \sim +50^{\circ}\text{C}$
Relative Humidity: $\leq 95\%$

I-9601/2

Intelligent Input Module

- Monitors switch contacts of remote equipment
- Two part plug-in construction with base mounted termination allows easy installation and connection
- Intelligent interface can be addressed and plugged in to base at time of commissioning
- Electronically addressed
- For surface mount cable installations use surface mount interface back box (SMIBB-1)

Technical Specifications

- Operating Voltage: Loop 24V
- Operating Current:
Standby Current $\leq 1\text{mA}$
Action Current: $\leq 5\text{mA}$
- Operating Environment:
Temperature: $-10^{\circ}\text{C} \sim +50^{\circ}\text{C}$
Relative Humidity: $\leq 95\%$
- Dimension: 120mmX80mmX40mm

I-9300

Interposing Relay Module

- A/C relay interface, used in conjunction with intelligent I/O module to interface with 220 volt equipment
- Two part plug-in construction with base mounted termination allows easy installation and connection
- Interface can be plugged in to base at time of commissioning
- For surface mount cable installations use surface mount interface back box (SMIBB-1)
- Can be used with conventional alarm circuits

C-9302

Intelligent Single Input /Output Module

- Addressable I/O with 24V /3Amp relay contacts
- Confirmation input to confirm to fire alarm panel the equipment controlled by the interface and responded when activated
- Two part plug-in construction with base mounted termination allows easy installation and connection
- Intelligent interface can be addressed and plugged in to base at time of commissioning
- Electronically addressed
- For surface mount cable installations use surface mount interface back box (SMIBB-1)

I-9301

Technical Specifications

- Operating Voltage: Loop 24V
- Operating Current:
Standby Current $\leq 1\text{mA}$
Action Current: $\leq 5\text{mA}$
- Wiring:
Non-polarised two-core for loop
Non-polarised two-core for 24VDC power supply
- Operating Environment:
Temperature: $-10^{\circ}\text{C} \sim +50^{\circ}\text{C}$
Relative Humidity: $\leq 95\%$
- Dimension: 120mmX80mmX40mm

Intelligent Security Interface

- Integrates standard security devices into the alarm network
- 24 to 12volt (DC) step-down for powering of security devices
- Two part plug-in construction with base mounted termination allows easy installation and connection
- Intelligent interface can be addressed and plugged in to base at time of commissioning
- Electronically addressed
- For surface mount cable installations use surface mount interface back box

I-9306

Intelligent Remote Indicator

- Intelligent Addressable Remote indicator
- Can be program linked to any single or group of devices
- High Intensity flashing LED in alarm condition
- Electronically addressed
- Conventional version also available (C-9314)

I-9314

Intelligent Zone Monitor Unit

- Interfaces with conventional fire detection equipment
- Can connect up to 15 detectors
- Can connect to Sprinkler Zone Valve and Flow Switch
- Can interface Conventional Fire Devices onto an Addressable Loop
- Electronically addressed

Technical Specifications

- Operating Voltage: Loop 24V
- Operating Current:
Monitoring Current $\leq 0.5\text{mA}$
Action Current: $\leq 5\text{mA}$
- Capability: 15 conventional detectors
- End of line: $4.7\text{k}\Omega$ resistor or AEOL
- Action Resistor: $470\sim 680\Omega$
- Operating Environment:
Temperature: $-10^{\circ}\text{C}\sim +50^{\circ}\text{C}$
Relative Humidity: $\leq 95\%$
- Dimension: $120\text{mm}\times 80\text{mm}\times 40\text{mm}$

I-9319

Intelligent Sounder Driver

- The Driver for non-addressable sounders/bells
- Two addresses for Alert and Evacuate Control
- Two part plug-in construction with base mounted termination allows easy installation and connection
- Intelligent interface can be addressed and plugged in to base at time of commissioning
- Electronically Addressed

Technical Specifications

- Operating Voltage: Loop 24V
- Operating Current:
Standby Current $\leq 1\text{mA}$
- Output: Maximum 1A, polarized
- End of line: $10\text{k}\Omega$ resistor
- Operating Environment:
Temperature: $-10^{\circ}\text{C}\sim +50^{\circ}\text{C}$
Relative Humidity: $\leq 95\%$
- Dimension: $120\text{mm}\times 80\text{mm}\times 40\text{mm}$

I-9308

Intelligent Sounder Beacon

- Addressable combined flashing beacon and sounder
- Two part plug-in construction with base mounted termination allows easy installation and connection
- Intelligent interface can be addressed and plugged in to base at time of commissioning
- Electronically addressed
- Conventional version also available (C-9401)

Technical Specifications

- Operating Voltage: Loop 24V
- Operating Current:
24VDC: Standby Current: $\leq 10\text{mA}$; Alarming Current: $\leq 160\text{mA}$;
Loop: Standby Current: $\leq 0.8\text{mA}$; Alarming Current: $\leq 6.0\text{mA}$;
- Alarm volume (SPL): $\geq 95\text{dB}$ @1 Meter.
- Wiring:
Non-polarised two-core for loop
Non-polarised two-core for 24VDC power supply
- Operating Environment:
Temperature: $-10^{\circ}\text{C} \sim +50^{\circ}\text{C}$
Relative Humidity: $\leq 95\%$
- Dimension: 144mmX90mmX57mm

I-9401

Sounder Base

- Base Mounted Sounder.
- Can be used as a common base of detector or stand alone with a cover.
- No need of extra power supply.
- Two addresses for Alert and Evacuate Control.
- Conventional Version also available (C-9402)

Technical Specifications

- Operating Voltage: Loop 24V
- Operating Current:
Standby Current $\leq 1\text{mA}$
Action Current: $\leq 15\text{mA}$
- Alarm volume (SPL): $\geq 85\text{dB}$ @1 Meter.
- Operating Environment:
Temperature: $-10^{\circ}\text{C} \sim +50^{\circ}\text{C}$
Relative Humidity: $\leq 95\%$
- Dimension: Diameter: 10cm Height: 3.5cm (without cover), 4.5cm (with cover)

I-9402

Intelligent Single Loop Fire Alarm Panel

- Single Loop addressable fire detection panel packed with features not usually associated with smaller systems, providing a high quality solution at exceptional good value.
- Loop capacity 235 intelligent devices.
- Graphical LCD Display.
- 30 Zone indication and manual intervention panel
- Networkable with all GST Fire panels
- Programmable from PC.
- Built-in gas extinguishing control.
- Integrated Security alarm facilities
- Optional Colour Graphics
- Optional Fireman's Control panel
- Optional Panel Printer
- Advanced user friendly programming software including 'Fuzzy Logic'

Technical Specifications

- Power supply: AC220V 50/60Hz
- Operating Environment:
Temperature: -10°C~+ 40°C
Relative Humidity: ≤95%
- Dimension: 400mmX560mmX178mm

GST-500

Intelligent Two Loop Fire Alarm Panel (Expandable to 4 Loops)

- Two Loop addressable fire detection with integrated controls providing the perfect solution for all medium sized projects
- Loop capacity 242 intelligent devices. (Total 484 addressable points)
- Large Graphical LCD Display.
- 30 Zone indication and manual intervention panel
- Networkable with all GST Fire panels
- Programmable from PC or via on board keypad.
- Built-in gas extinguishing control.
- Integrated Security alarm facilities
- Optional Fireman's Control panel
- Panel Printer
- Optional Colour graphics
- Advanced user friendly programming software including 'Fuzzy Logic'.
- 4-Loop Version Available (Maximum 700 devices on Loop)

Technical Specifications

- Power supply: AC220V 50/60Hz
- Operating Environment:
Temperature: -10°C~+ 40°C
Relative Humidity: ≤95%
- Dimension: 500mmX700mmX170mm

Graphical User Interface

- Colour graphic control and display system, providing a complete window on to the fire detection system and network along with additional integrated and ancillary equipment i.e. Fire telephone and voice alarm.
- Compatible with all GST Intelligent fire panels
- Multi-level password control for convenient system management

GUI

Intelligent Modular 1-20 Loop Fire Alarm System

- The larger brother to the GST 500, this fire command system, with modular loop cards expandable to 20 loops and integrated controls enables full integration with GST Voice alarm and fire telephone systems. Housed in either rack or console type housings provides the perfect solution for all medium to large systems
- Loop capacity 242 intelligent devices (up to 4840 addressable points)
- Large Graphical LCD Display.
- Zone indication and manual intervention control
- Networkable with all GST Fire panels
- Programmable from PC or via on board keypad.
- Built-in gas extinguishing control.
- Integrated Security alarm facilities
- Optional Fireman's Control panel
- Panel Printer
- Optional Colour graphics
- Advanced user friendly programming software including 'Fuzzy Logic'
- Total integration with GST addressable Voice alarm systems.
- Total integration with GST addressable Fire Telephone systems.

Technical Specifications

- Power supply: AC220V 50/60Hz
- Operating Environment:
Temperature: -10°C~+ 40°C
Relative Humidity: ≤95%
- Dimension: 580mmX520mmX18730mm

GST8000

Intelligent 128 Loop Fire Alarm System

- The Flag ship in the GST range of Fire command centres, With its large touch screen colour graphic LCD control panel expandable up to 128 loops, and full integration with the GST range of intelligent Voice alarm and Fire telephone solutions systems. Networkable control via the LON works network, enabling total integration with the GST building management systems providing a seamless complete control system for the most demanding of projects
- Loop capacity 242 intelligent devices. (up to 30,000 addressable points)
- Large Touch Screen Colour Graphic LCD Display
- Zone indication and manual intervention control
- Lon Works Network facilities
- Built-in gas extinguishing control
- Integrated Security alarm facilities
- Colour graphics
- Advanced user friendly programming software including 'Fuzzy Logic'
- Total integration with GST addressable Voice alarm systems.
- Total integration with GST addressable Fire Telephone systems.
- Integrated with GST Intelligent Building Management system

Intelligent Modular 1-40 Loop Fire Alarm System

GST6000

- With onboard Color Graphic
- Optional Touch Screen Control

LCD Repeater Panel

GST852RP

- Aesthetically pleasing design with large LCD display
- Compatible with all GST intelligent fire alarm controllers
- Two part plug-in construction with base mounted termination allows easy installation and connection
- Repeater can be plugged in to base at time of commissioning

Fireman's Control Panel

GST14FCP

- Integrated Firemans' control panels
- Automatic and manual control
- CPU control
- Hinged switch covers to stop accidental operation
- Compatible with all fire control panels

Conventional Fire Alarm Panels

GST102/104/108

- 2/4/8 zone conventional fire alarm panels.
- Both End of Line Resister and Active End of Line can be used.
- Day/night mode selected
- Key-control evacuate
- Repeater is available for GST108
- Fire alarm output for remote alarm
- Class Change terminal for remote control

Technical Specifications

- Power supply: AC220V 50/60Hz
- Operating Environment:
Temperature: $-10^{\circ}\text{C} \sim +40^{\circ}\text{C}$
Relative Humidity: $\leq 95\%$
- Dimension: 380mmx320mmx95mm
- 15 fire detectors and infinite manual buttons each zone

Active End Of Line

P-9907

- Active End Of Line for conventional fire detection loop.
- It can be used as conventional detector base or work independent with a cover

Power Supply Unit

- 3amp 24 volt DC Intelligent PSU
- Display shows AC input Voltage, DC output Voltage
- Fully monitored with self test facilities
- Addressable intelligence enabling full monitoring and reporting to Fire Control panel(PSU24-3A)
- Requires 2x 12volt battery for standby power

Technical Specifications

- Power supply:AC220V 50/60Hz
- Operating Environment:
Temperature: -10°C~+ 40°C
Relative Humidity: ≤95%
- Dimension: 310mmX400mmX115mm

PSU24-3

Intelligent Boxed PSU

- 6amp 24 volt DC Intelligent PSU
- Display shows AC input Voltage, DC output Voltage,DC Load (amps)
- Fully monitored with self test facilities
- Only requires 2x12volt battery for standby power

Technical Specifications

- Power supply:AC220V 50/60Hz
- Operating Environment:
Temperature: -10°C~+ 40°C
Relative Humidity: ≤95%
- Dimension: 500mmX440mmX170mm

PSU24-6

Intelligent Network Boxed PSU

- All the Facilities of PSU24-6 with the added facility of addressable control enabling full monitoring and reporting
- Addressable control enables remote reset facilities (enabling non-intelligent ancillary DC powered equipment that requires the removal of power to be reset)

Technical Specifications

- Power supply: AC220V 50/60Hz
- Operating Environment:
Temperature: -10°C~+ 40°C
Relative Humidity: ≤95%

PSU24-6A

Intelligent Power Panel PSU

- 19" Rack Mountable 2u PSU
- 6amp 24volt DC Intelligent PSU
- Display shows AC input voltage, DC output voltage, DC Load (amps)
- Fully monitored with self test facilities
- Only requires 2x12volt battery for standby power

PSU24-6RM

Extinguishing Cylinder Control Panel

- Capable of controlling upto 6 zone of extinguishing
- Direct Intelligent control Via addressable Loop
- Auto and manual control Facilities
- Fully monitored status control

GST302/304/306

Addressable Gas Extinguishing Warning Indicator

- Normally located above the entrance to the gas extinguishing protected area
- Eliminate prior to gas release
- Electronically addressed

I-9318

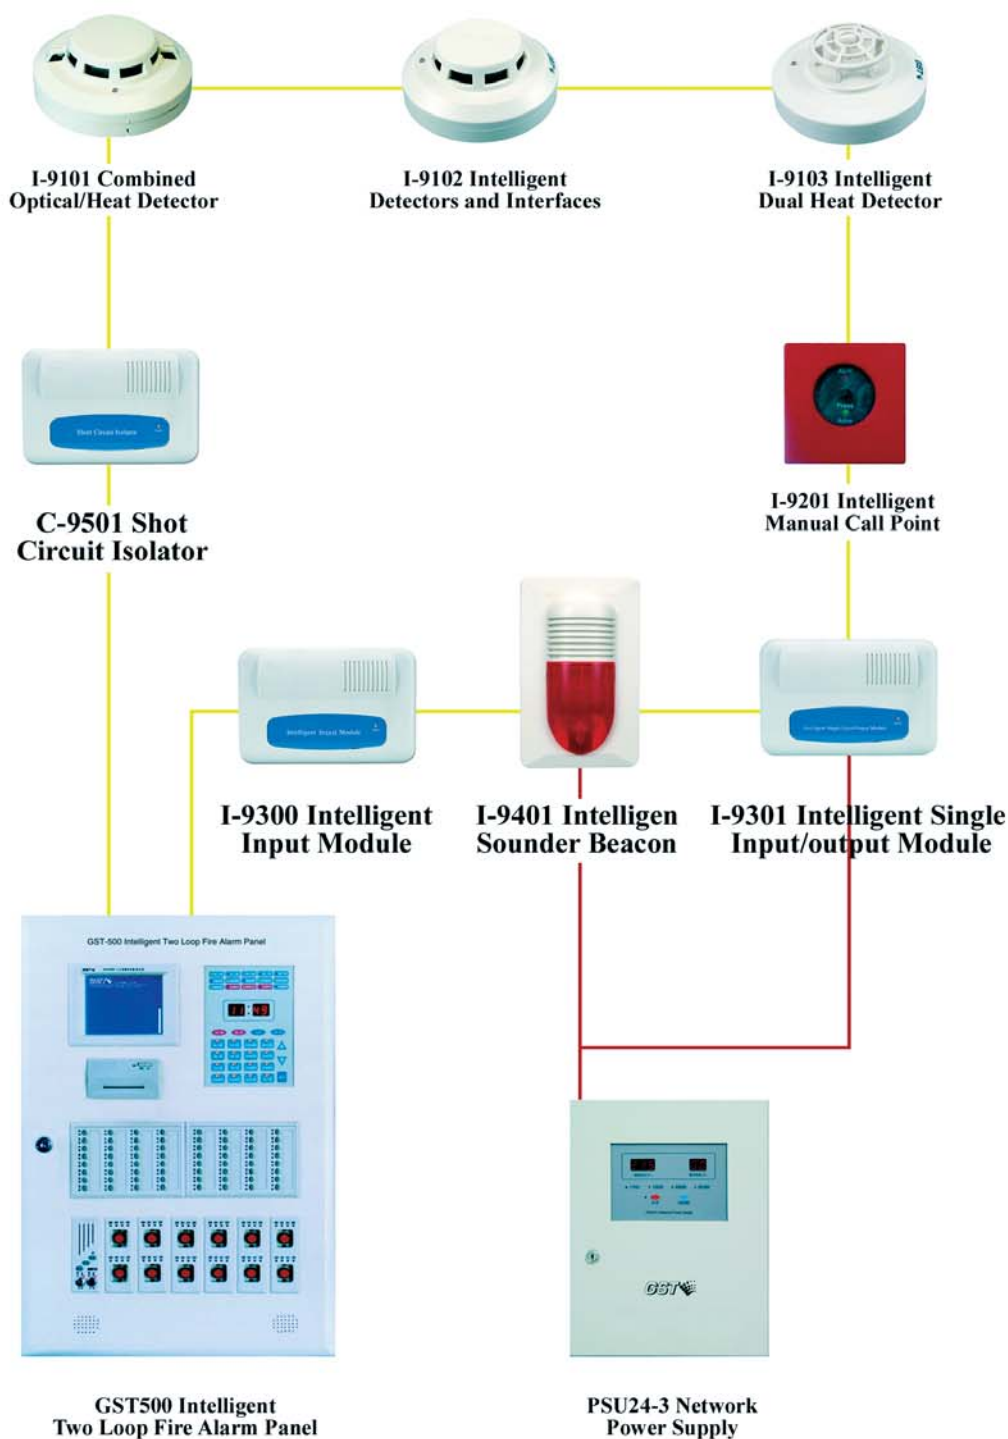

Emergency Remote Control

- Emergency Abort / activate gas release buttons

I-9317

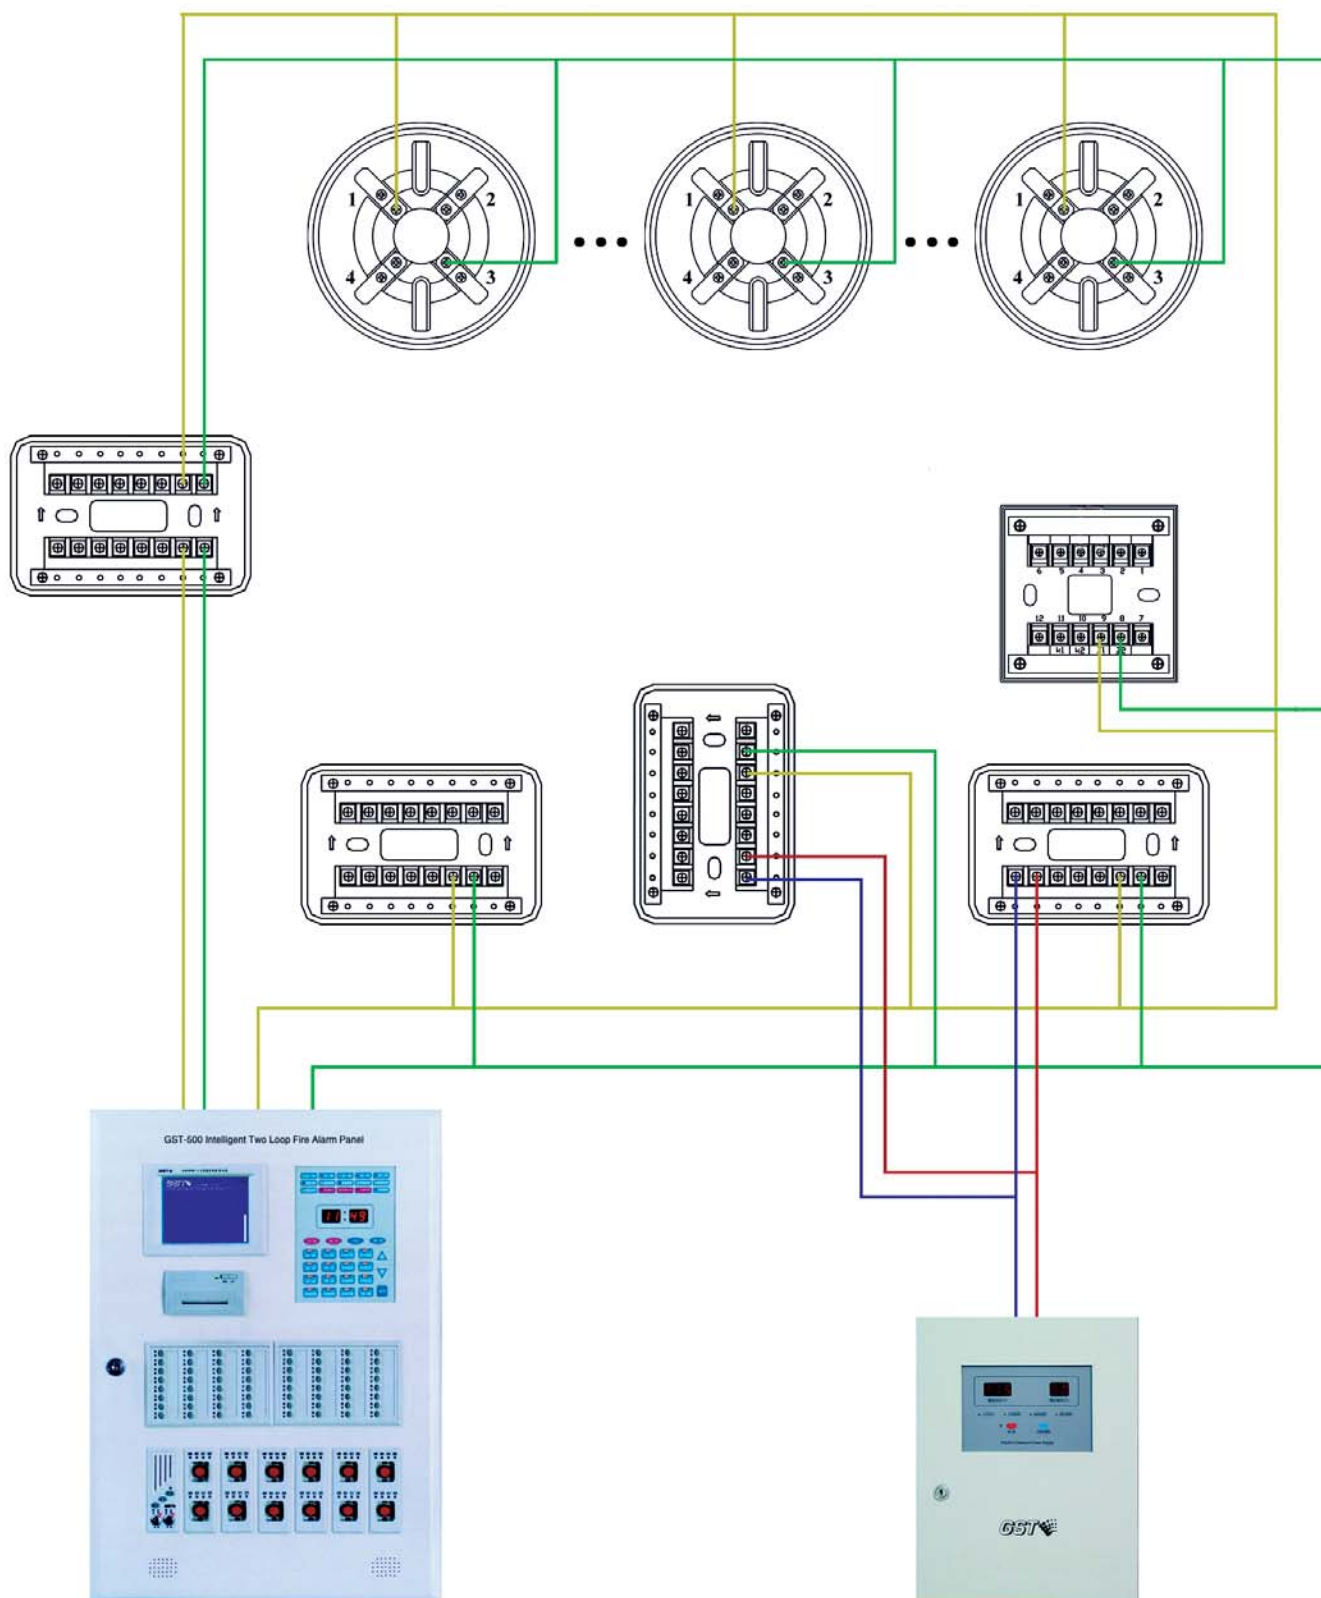

Intelligent Fire Alarm System

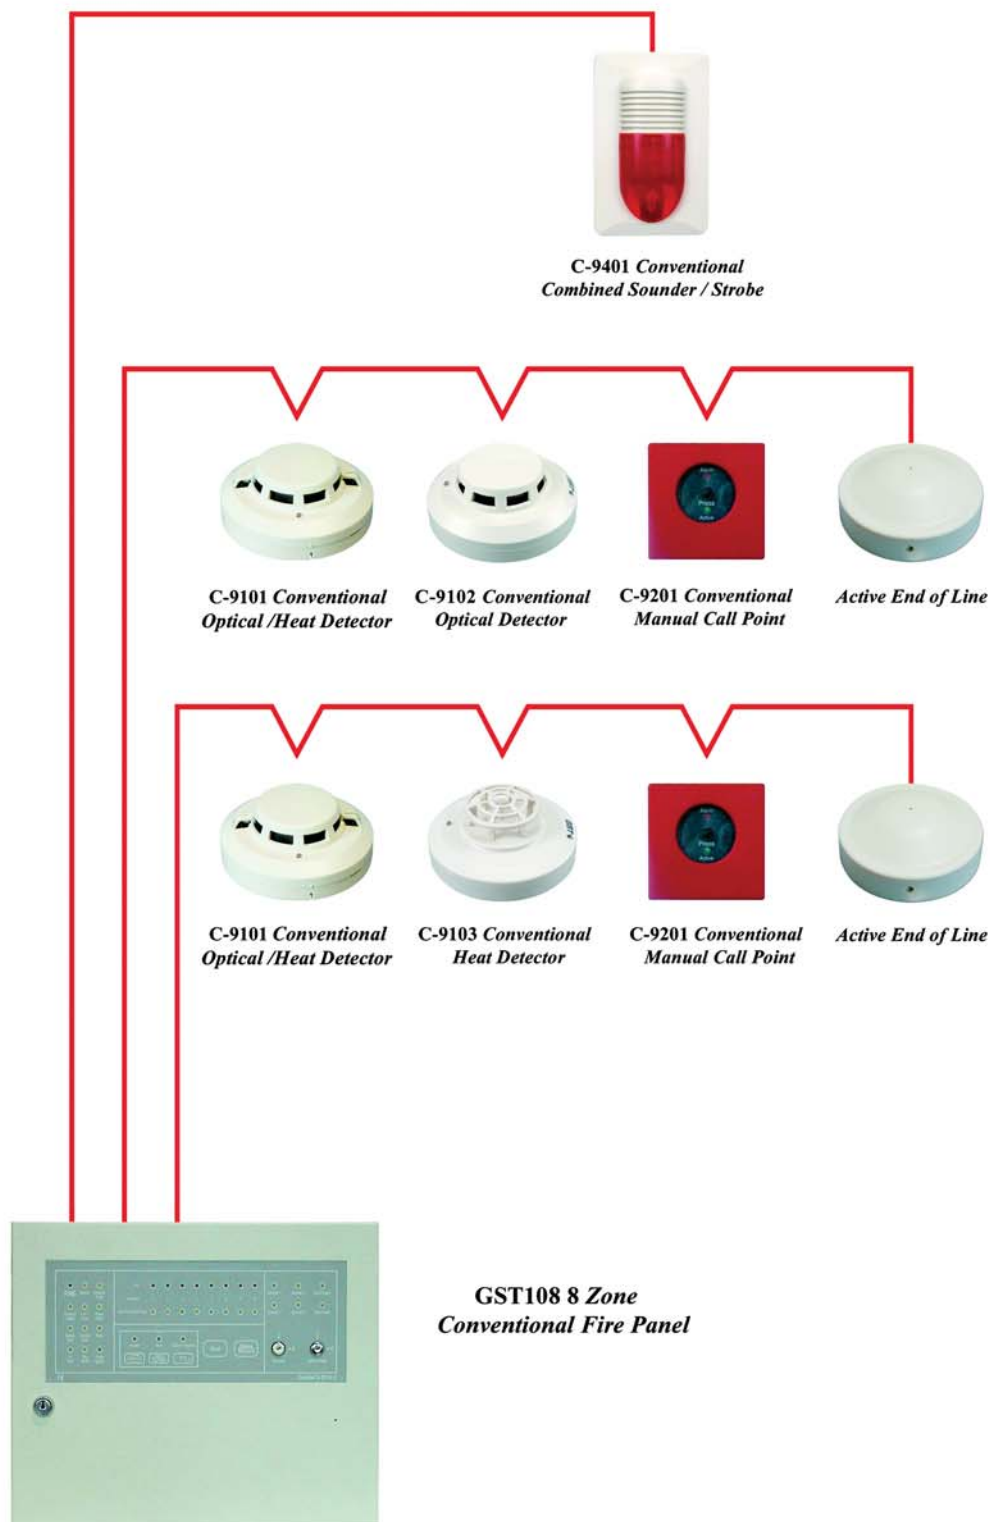

Intelligent Fire Alarm System Connection

Conventional Fire Alarm System

Conventional Fire Alarm System Connection

1. Using End Of Line Resistor.

NOTE In compliance with EN/BS standards, when using EOL Resistor, call points should be wired before detectors, so that the removal of any detector will not inhibit call points from operating.

2. Using Active Of Line:

AEOL enables call points to be installed in any location on zone (circuit), as will not be affected by removal of detector (Diode base DZ-03D is required for detectors).

Please pay attention to the polarisation.

GST is widely accepted as a World Leader in the development and manufacture of Integrated Fire Detection and Building Automation Systems. With the complete range of products GST has a solution to suit your requirements, from a small system up to large fully integrated solution.

This catalogue provides an overview of our range of fire detection products, other products manufactured by GST not covered in this publication include:

Intelligent Voice Alarm (VA)

EX Intrinsically Safe Fire Detectors and Barriers

Intelligent Integrated Building Management Systems.

Intelligent Hotel and Guest Room Control Systems.

Intelligent Residential Control Systems .

Intelligent Power Metering.

Smart Card Controlled Power Metering.

Intelligent Access Control.

For further information and enquiries about the GST range of equipment please contact your Regional GST approved systems partner as detailed on the rear cover of this publication, or via our Website **www.gstplc.com**
E-mail: **info@gstplc.com**
